A close-up photograph of an older man with grey hair, a grey goatee, and black-rimmed glasses. He is wearing a grey textured sweater and looking down with a serious expression. The background is blurred, showing what appears to be a window with light coming through.

75 or over? Protect yourself from serious lung infection.

Every year, thousands of older people need hospital care for respiratory syncytial virus (RSV) infection. RSV vaccination is the best way to get protection.

Contact your GP practice to book in for your free RSV vaccine. Only one vaccine is needed for protection for a few years.

The background of the top half of the image is a photograph of an elderly woman with short, curly white hair. She is wearing black-rimmed glasses, a blue beaded necklace, and a white lace-trimmed top. She is smiling slightly and looking towards the right. The background behind her is a white lace doily on a pink surface.

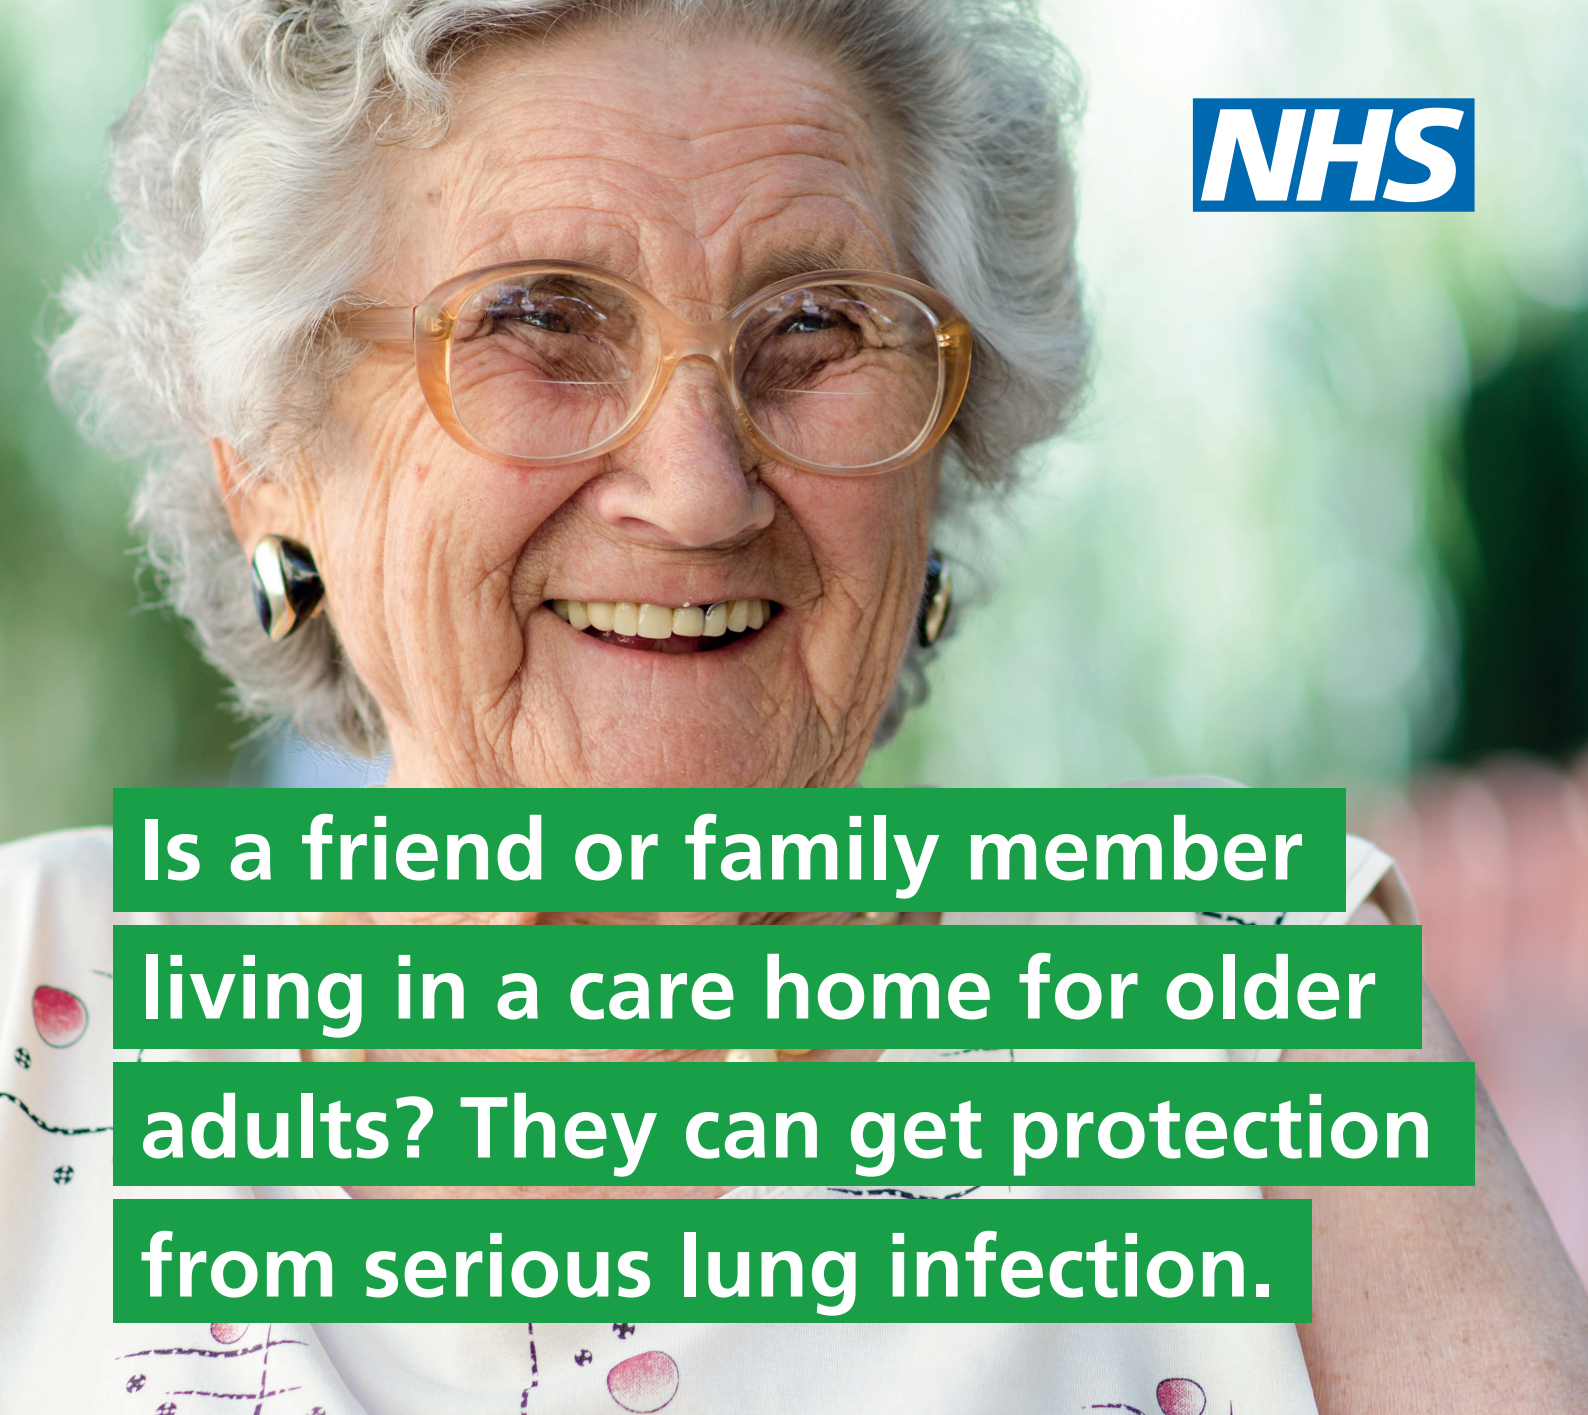

**Check if you or your friends
and family can get the RSV
vaccine to protect against
serious lung infection.**

You can get the free respiratory syncytial virus (RSV) vaccine if you:

- Are aged 75 or over
- Are living in a care home for older adults

Contact your GP or talk to a member of staff at the care home about how to get the vaccine.
